CENTRO DE INVESTIGACIONES REGIONALES "DR. HIDEYO NOGUCHI"

UNIDAD DE CIENCIAS BIOMÉDICAS

April 22, 2026

To whom it may concern,

It is my pleasure to strongly recommend Pool García Héctor Jesús, who is currently participating under my supervision in the Short Research Internship Program (PECI) 2026 at the Autonomous University of Yucatán.

I first met Pool Héctor during the summer of 2025, when he enrolled in my Genetics course as part of an advanced summer academic program. From the beginning, he distinguished himself through his strong academic performance, intellectual curiosity, and genuine interest in the subject.

Since then, I have had the opportunity to work more closely with him during his ongoing research internship. From the start of this program on February 3, he has consistently demonstrated a high level of commitment to both his academic and research training. Although the internship is still in progress and is scheduled to conclude on April 30, he continues to engage actively in all assigned activities with outstanding responsibility and enthusiasm.

Pool Héctor has shown strong skills in analytical thinking, problem-solving, and teamwork. His ability to integrate theoretical knowledge with practical research applications is particularly noteworthy. Additionally, his proactive attitude and willingness to take on new challenges have allowed him to adapt and contribute effectively within the research environment.

Based on his academic performance and research involvement, I confidently and unequivocally recommend Pool García Héctor Jesús for the Remote Research Program offered by Clubes de Ciencia México. I am confident that he will make meaningful contributions to the program and take full advantage of this opportunity.

Please feel free to contact me should you require any further information.

Sincerely,

Dr. Rodrigo Rubi Castellanos

Autonomous University of Yucatán
